-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-4 and 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-4 and 11-15 are vague and indefinite for not clearly indicating which “first side” and which “second side” is being referred to in the claims since both the front template and the side template have first and second sides set forth in the independent claims.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5, and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by either Riedel, Livick, or Diaz.

The device as claimed is disclosed by Riedel with a front template (38 coupled to 25 and 24) having a through hole and a recess to engage the door and a side template 22 having through holes that is removably attached to the front template.

Art Unit: 2859

The device as claimed is also disclosed by Livick with a front template (30 coupled to 12 and 10) having a through hole and a recess to engage the door and a side template 22 having through holes that is removably attached to the front template.

The device as claimed is disclosed by Diaz with a front template 12 having a through hole and a recess to engage the door and a side template 16 having through holes that is removably attached to the front template.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Riedel, Livick, or Diaz in view of Leite.

The device as claimed is disclosed by either Riedel, Livick, or Diaz as stated in the rejection recited above for claims 1-3, 5, and 10-12, but lacks the front template and the side template being connected by posts.

Leite teaches using posts to removably connect parts of a geometric device to make the device modular. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use posts in either Riedel, Livick, or Diaz as taught by Leite to connect either removable parts to quick connection or removably connect fixed parts to dismantle the device during storage.

***Allowable Subject Matter***

Art Unit: 2859

7. Claims 4 and 13-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
